SUMMARY

.NET Full Stack Developer with 2+ years of experience building scalable enterprise applications for Microsoft. Skilled in C#, ASP.NET Core, React, and Azure with a focus on accessibility, performance, and secure application development.

EXPERIENCE

LTM <i>Software Engineer</i> Client: Microsoft	<i>April 2024 – Present</i> Full-time
– Device Reporting Portal	
– Developed and maintained a multi-tier enterprise web application for OEM partner device sales reporting, supporting Microsoft’s Device Partner ecosystem.	
– Developed key features including notification systems and alert configuration modules to improve system monitoring and user engagement.	
– Onboarded special programs and integrated UHF data pipelines to enable accurate and scalable reporting workflows.	
– Architected a secure user impersonation system with database-backed state management, reducing admin testing effort by 70%.	
– Led accessibility improvements by resolving 150+ issues, elevating compliance rating from D to C and earning stakeholder recognition.	
– Owned Dev/Staging deployments and ensured high-quality releases with near-zero post-deployment defects.	
– Tech Stack: .NET 8, C#, ASP.NET Core Razor Pages, Azure Blob Storage, SQL Server, JavaScript, jQuery, Bootstrap.	
– Device Selling Platform (DSP) — An internal Microsoft platform supporting device sales operations through two key portals: Permissions Portal and Featured Devices Platform.	
– Contributed to the development and enhancement of both portals, improving usability and overall system performance.	
– Improved accessibility compliance to meet WCAG standards, ensuring compatibility with tools like Narrator and FastPass, and adhering to color contrast requirements.	
– Designed and implemented new features to enhance user experience and functionality across both portals.	
– Tech Stack:	
• Permissions Portal — ASP.NET MVC, C#, and SQL Server for role-based access management and workflow logic.	
• Featured Devices Platform — React frontend, .NET backend, and SQL Server for relational data management.	

PROJECTS

– GitHub Copilot CLI — Custom AI Agents <i>LTM</i>	<i>april 2026 – Present</i>
– Built a UX Designer Agent using GitHub Copilot CLI, providing design-standard-aware suggestions aligned with project conventions, reducing back-and-forth between designers and developers.	
– Developed a Design Doc Generator Agent that automated structured design documentation for developers handling complex functionalities, significantly reducing manual documentation effort.	
– Tools & technologies used: GitHub Copilot CLI, Prompt Engineering.	

TECHNICAL SKILLS

– Languages: C#, Python, JavaScript, TypeScript
– Frameworks & Frontend: .NET, ASP.NET Core, React, HTML, CSS, Bootstrap
– Cloud, DevOps & Databases: Azure, CI/CD, SQL Server
– Tools & Concepts: GitHub Copilot CLI, Git, Power BI, REST APIs, Prompt Engineering, Accessibility

CERTIFICATIONS

– Microsoft Certified: Azure AI Fundamentals — Microsoft
– Microsoft Certified: Azure Fundamentals — Microsoft
– Microsoft Certified: Power BI Data Analyst Associate — Microsoft
– Modern Big Data Analysis with SQL — Cloudera

EDUCATION

– Lovely Professional University, Punjab <i>Bachelor of Technology (CSE)</i>	<i>CGPA: 8.11</i> 2019 – 2023
– Narayana Junior College, Nellore <i>Board of Intermediate Education, Andhra Pradesh</i>	<i>CGPA: 10</i> 2017 – 2019
– Rayalaseema High School, Tirupati <i>Board of Secondary Education, Andhra Pradesh</i>	<i>CGPA: 10</i> 2016 – 2017
